PROJECTS

Jetfire Jan 2022 – Present

- Jetfire is designed to provide a user interface to review and clear suspended records in agent commission processing and metrics calculations.
- Jetfire is a core component of the Optimus platform, replacing functionality in Comp UI, Allbridge UI and other systems.

Mercury April 2020 – Dec 2022

- Mercury is a product that will eventually serve as the system of record for all bulk book of business sales and transfer, and agent change on a policy.
- It includes a cloud-based application for entering details about the selling and buying agents, a database to store the information, and web services to publish book sale and transfer details.

Estuate Internal Portal Jan 2017 – Mar 2020

- The application is a robust solution for the employee and talent management suites.
- The application includes modules like Leave Management System(LMS), Timesheet Management System(TSM), SLA(Service Level Agreement) Tracking System, Recruitment Management System(RMS) to facilitate workforce planning and people analytics.
