Summary

As a Senior Consultant at Allstate, I deliver high-quality web software solutions for the insurance industry, using Spring Boot, Spring Batch, Java, React Js, Redux, RDMS Database, Power BI, and Apache Kafka. I work with an architect team to design product features and participate in design decisions, and I contribute to early quality activities, including peer reviews of estimates, designs, and code.

I have over four years of experience as a full-stack application developer, having worked as a Consultant and a Software Engineer at Estuate, Inc. before joining Allstate. I graduated with a Bachelor of Engineering degree in Electronics and Control/Instrumentation Engineering from Sathyabama University. I am passionate about product design, cloud computing, and programming languages, and I am always eager to learn new technologies and tools.

Experience

Senior Consultant

Allstate

Jan 2022 - Present (2 years 3 months)

- Successful delivery of high-quality web software (requirements, design, code, documentation, etc.)
- Roughly 90% hands-on coding
- Work with an architect team to design product features and participate in design decisions
- Contribute to early quality activities, including peer reviews of estimates, designs and code
- Resolve defects/bugs during QA testing, pre-production, production, and post-release patches
- Partner effectively with all team members to deliver against commitments
- Work cross-functionally with various teams: product management, QA/QE, various product lines, or business units to drive forward results
- Commitment to team success and positive team dynamics
